

AccessData eDiscovery 7.4.0

Release Notes

Document Date: 11/9/2020

©2020 AccessData Group, Inc. All rights reserved

Introduction

This document lists the new features, fixed issues, and known issues for this version of AD Enterprise. All known issues published under previous release notes still apply until they are listed under “Fixed Issues.”

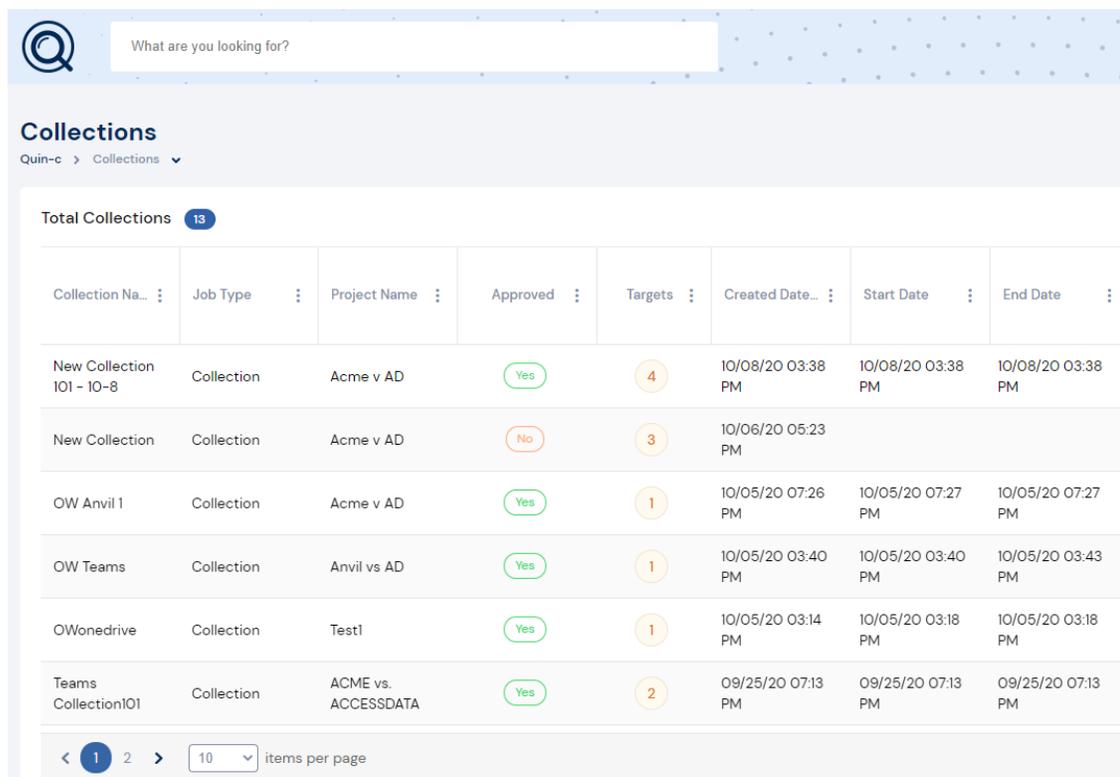

- What is New in 7.4.0 on page 2
- Fixed Issues in 7.4.0 on page 4
- Important Information on page 5
- 7.4.0 Known Issues (Including All Service Packs) on page 6

What is New in 7.4.0

The following items are new and improved for this release:

User Interface

- All new HTML5 based user interface
 - Streamlined workflows (fewer mouse clicks to get the same results).
 - Supports all modern web browsers.
 - No end-user browser dependencies, plug-ins, or separate installers for a document viewer required.

The screenshot shows a web application interface for 'Collections'. At the top, there is a search bar with the placeholder text 'What are you looking for?'. Below the search bar, the page title 'Collections' is displayed, followed by a breadcrumb 'Quin-c > Collections'. A summary bar indicates 'Total Collections 13'. The main content is a table with the following columns: 'Collection Na...', 'Job Type', 'Project Name', 'Approved', 'Targets', 'Created Date...', 'Start Date', and 'End Date'. The table contains seven rows of data, each representing a collection job. At the bottom of the table, there is a pagination control showing '1' selected, '2' as an alternative page, and a dropdown menu set to '10 items per page'.

Collection Na...	Job Type	Project Name	Approved	Targets	Created Date...	Start Date	End Date
New Collection 101 - 10-8	Collection	Acme v AD	Yes	4	10/08/20 03:38 PM	10/08/20 03:38 PM	10/08/20 03:38 PM
New Collection	Collection	Acme v AD	No	3	10/06/20 05:23 PM		
OW Anvil 1	Collection	Acme v AD	Yes	1	10/05/20 07:26 PM	10/05/20 07:27 PM	10/05/20 07:27 PM
OW Teams	Collection	Anvil vs AD	Yes	1	10/05/20 03:40 PM	10/05/20 03:40 PM	10/05/20 03:43 PM
OWonedrive	Collection	Test1	Yes	1	10/05/20 03:14 PM	10/05/20 03:18 PM	10/05/20 03:18 PM
Teams Collection101	Collection	ACME vs. ACCESSDATA	Yes	2	09/25/20 07:13 PM	09/25/20 07:13 PM	09/25/20 07:13 PM

Data Collection

- Integration with Graph API enables Exchange email collection a behind single-sign on authentication server. (QLT-459)

Installation

- The eDiscovery 7.4.x installer is now part of the Forensic Tools Suite installer. (ER-428)
- eDiscovery 7.4.x installs side-by-side with eDiscovery 7.1.1 SP5 so as to complement the entire EDRM workflow not yet implemented into the new 7.4.x interface.

Litigation Hold

- Added **check all** and **un-check all** controls to the *Exclude From Interview* and *Exclude from Escalation* columns. (ER-498)

Exclude From Interview <input checked="" type="checkbox"/>	Exclude From Escalation <input checked="" type="checkbox"/>	Actions
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

Fixed Issues in 7.4.0

The following have been fixed in this release:

- No fixes to note for this release.

Important Information

Latest Documentation

- For the latest versions of the Release Notes, Administration Guide, and Reviewer Guide, download www.accessdata.com/productdocs/adediscovery/ediscovery.zip

General

- Any AD1 created by FTK/Summation/eDiscovery 6.0 or later can only be opened with Imager 3.4.0 or later.

Imager 3.4 can be freely download from the AD website:

<http://accessdata.com/product-download> Using an older version of Imager will result in an "Image detection failed" error.

This happens because the AD1 format was enhanced to support forward compatibility between AccessData applications. Newer AD1 files have a version 4 in the header instead of 3.

Installation

- During installation, Microsoft Framework .NET version 4.7.x will automatically be installed if needed.
- After upgrading, it is important clear your web browser cache before using the upgraded version's web console.

Comments?

We value all feedback from our customers. Please contact us at support@accessdata.com, or send documentation issues to documentation@accessdata.com.

7.4.0 Known Issues (Including All Service Packs)

- Document redactions created in AD eDiscovery 7.1.x or earlier are not preserved in eDiscovery 7.4.x. Possible work-arounds include:
 - Continue using 7.1.x for affected cases and use 7.4.0 for new cases.
 - Burn-in the redactions for each case using 7.1.x before using the case in 7.4.
 - Recreate each redaction in 7.4.x
- When a PDF is password protected, the filtered text cannot be extracted. Random characters are displayed in the Filtered Text view rather than a warning that the text could not be extracted. (8679)
- If Port 80 is blocked on the server, the Web Console does not load and no error is displayed. (10087)
- Some collection jobs against a Microsoft Teams server will result in the following error in certain environments. (ER-156)

```
“WARN MSTeamCollectorWrapper.Collector.MicrosoftTeamsClient [(null)] - Status Code: NotFound”
```

- Conversation messages collected from a Microsoft Teams server will export to a usable file that does not have a file extension. (ER-161)
- Chat messages collected from Microsoft Teams servers can only be exported as one individual message sent or received per file exported. There is no way to export an entire MS Teams chat conversation at this time. (ER-162)
